EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Oren on 05 August 2005.

The application has been amended as follows:

- a.) In claim 1, line 8, delete the "the" before "previous" and replace with "a".
- b.) In claim 1, line 15, delete the period at the end of the sentence and add " ; where L and W are integers ."
- c.) In claim 4, at the end of line 10, delete the period at the end of the sentence and add " ; where T is an integer ."
- d.) In claim 5, at the end of line 10, delete the period at the end of the sentence and add " ; where T is an integer ."
- e.) In claim 6, at the end of line 10, delete the period at the end of the sentence and add " ; where T is an integer ."
- f.) In claim 8, line 9, delete the "the" before "previous" and replace with "a".
- g.) In claim 8, at the end of line 15, delete the period at the end of the sentence and add " ; where W and L are integers ."
- h.) In claim 11, at the end of line 10, delete the period at the end of the sentence and add " ; where T is an integer ."

- i.) In claim 12, at the end of line 10, delete the period at the end of the sentence and add
“ ; where T is an integer .”
- j.) In claim 13, at the end of line 11, delete the period at the end of the sentence and add

- n.) In claim 17, in lines 3 and 4, delete the phrase “ and N is an integer equal to 0; ” and
add “ and L is an integer; ”.
- o.) In claim 23, in line 9, delete the phrase “ wherein the N is and integer in a range of 0
to N; ” and replace with “ wherein N, W, W_0 , and L are integers; “.
- p.) In claim 24, in lines 7-8, delete the phrase “ wherein the N is and integer in a range of

- q.) In claim 25, in line 11, delete the period at the end of the sentence and add
“ , wherein W, W_0 , and L are integers; “.

2. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: Delete the title “Related Art” from Fig. 2. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: The instant application discloses a method and apparatus for decoding turbo codes using a sliding window method. A search of prior art records has failed to disclose "a MAP decoder, comprising: a backward processor that calculates first resultant values of an L-symbol long sequence and second resultant values of a W-symbol long sequence; a forward processor that calculates third resultant values; a memory that stores the second resultant values in a first order and outputs the second resultant values in a second order that is the reverse of the first order" along with the remaining limitations of claim 1. The prior art also does not teach "a method of performing an MAP turbo decoding, comprising: calculating first resultant values of an L-symbol long sequence; calculating second resultant values of a W-symbol long sequence; calculating third resultant values of the W-symbol long sequence; storing the second resultant values in a first order and outputting the stored second resultant values in a second order that is the reverse of the first order" along with the remaining limitation of claim 8. The prior art also does not disclose a method of turbo-decoding a received sequence using a Maximum A Posteriori (MAP) algorithm, comprising: "wherein if a processing length of the backward processor is W and a length of a received bit sequence is K, a length of a first data block W_0 to be processed is determined by the equation $K \bmod W$ " or "determining a decoding output using the first resultant values and the second resultant values, wherein the W_0 is a remainder obtained by dividing a received sequence by the second processing length W" as disclosed in claims 15 and 25, respectively. The prior art also fails to teach a Maximum A Posteriori (MAP) decoder comprising: "a backward processor for learning for a predetermined length L and calculating first state probability values for a

window length of W_0 of a received sequence from W_0 to 0 or for a window length W of a received sequence from $W_0 + (N+1)W$ to $W_0 + NW$ after the predetermined length L ” along with the remaining limitations of claims 23 and 24.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
